MISSION
Since our inception 26 years ago, our mission has been to raise the bar for innovation, quality, ease of use, and convenience on the products we offer to the salt water sport fishing enthusiast.

All aluminum outriggers are constructed of cold drawn aluminum for maximum strength and durability. We then use a state of the art anodizing process to protect and color-enhance them. Every accessory is constructed of the highest quality materials to give the maximum service and life. Tigress uses only 300 series stainless or 316 Stainless Steel in every rod holder and outrigger holder.

We continue to expand our offerings of fine products and accessories making the Tigress product line of outriggers and gear the standard of quality and excellence.
